- Displays respectfulness in all aspects of his relationship with other employees
- Allows minimal Non-Production Interruptions
- Shows problem solving ability
- Is adaptable and flexible.
- Is coachable
- Works productively
- Produces Quality Work

Requirements for the Job and Work Environment – it is important that the successful candidate has developed a skill set through his / her education and / or work experience that allows them to be capable of performing Machining tasks with a high degree of accuracy and quality within the work environment. Attributes we feel allow for this output are not limited too but are contained within the list below:

- Ability to follow drawings and make parts as per drawing.
- Can easily work with fractions and / or decimals.
- Experience using typical tooling such as micrometers, calipers, and levels.

- Ability to Setup machines including tooling and proper fixtures.
- Attachment setup on fixtures including clamping & holding devices.
- Comfortable working in a Conventional Machine environment.
- Has no issue keeping equipment and work area clean?
- Understands and is willing to perform preventative maintenance functions on equipment.
- Is capable of trouble shooting basic functionality of conventional equipment.
- Is willing to adjust workflow to be responsive to manufacturing and Service Customers.
- Has no issues lifting or handling pcs up to 50 lb
- Has developed good working practices regarding safety equipment, such as eye protection, hearing protection, etc.
- Communicates well.
- Is a team player.
- Has no issues with standing for the duration of the shift.

Educational / Work Experience - Education and work experience are both key in this role. Michaud is looking for a licenced machinist however the successful candidate may posses work experience with out a licence, that will allow the candite to be successful at this position.

****** Wage will be based on our assessment of the successful candidate.***
